- Medical Director
- Director
- Case Manager
- Physical Therapy Team
- Occupational Therapy Team
- Speech & Swallow Therapist
- Experienced Rehab Nurses
- Patient Services Assistants & Therapy Techs
- Social Worker
- Dietician
- Chaplains available upon request

Why Choose the Rehabilitation Center of Alamogordo?

- We provide highly individualized care, unique to your needs and abilities
- A 12-bed unit, a small and intimate rehab setting
- Expansive therapy gym
- Modern, cutting edge equipment and techniques to address your specific needs
- A dedicated team of physical, occupational and speech therapists
- Our approach to care includes significant involvement of the family and caregivers
- Large private rooms and baths
- A training apartment—to help you get ready for your return home
- Home evaluations by our therapy team with you—to ensure a safe discharge to your home when you are ready
- CARF-accredited rehabilitation facility—which means that we meet the highest standards of quality of care for our patients
- Daily physician management of your care
- Nursing care, 24 hours a day, 7 days a week
- Multiple therapy sessions per day and one-on-one treatments

We are committed to help you move through the continuum of care and to your discharge destination in the most medically appropriate and cost-efficient manner. We are dedicated to providing the best care necessary to meet your medical, physical, psychological and social needs in an environment that promotes wellness, confidence, and independence.

Our Success

As a CARF-accredited facility, we maintain the highest quality of care you will find in the region.

- Patient Satisfaction with our care and services: 4.9 out of 5
- Percentage of patients that are discharged to their home after their rehabilitation stay: >83%
- Patient reported results 30 days after discharge:

95% of the patients felt that their health was better or the same

90% of the patients are walking

80% of patients are getting out into the community for activities

85% did not have any emergency department visits

85% experienced no falls at home after discharge
